Midwest Conference on Student Learning in Economics:
Innovation, Assessment and Classroom Research
October 28, 2005
The University of Akron’s New Student Union

This third annual conference on the campus of The University of Akron features two giants in the field of economic education as keynote speakers.

**American Economics Association’s Teaching Innovations and the Interactive Teaching of Economics**

**Michael K. Salemi**
Professor of Economics
University of North Carolina at Chapel Hill

**Best of the Instruction Section of the Journal of Economic Education**

**Michael W. Watts**
Professor of Economics
Purdue University & Associate Editor, *Journal of Economic Education*

Faculty and teachers interested in learning new approaches to teaching economics and assessing learning at the introductory and intermediate levels should make plans to attend. Come and learn exciting ways to use experiments and other innovations in your classroom and to explore the value of classroom research and see what it takes to getting your classroom research published.

The Midwest conference also prides itself in displaying the latest in innovative technology, useful assessment tools and helps with doing classroom research and applying the results of that classroom research to your class Monday morning. This year is no exception and the promise is for the best conference thus far in the three-year history of this conference. **The Technology Showcase** will feature opportunities to see products that can help make your job of teaching more efficient and more productive as well as the opportunity to speak to the professors who use them.

Information on housing, the program and a call for papers, including the ability to register online is available on the conference website:
